REASONS FOR ALLOWANCE

- 1. The following is an examiner's statement of reasons for allowance: The cancellation of claims 1-25 is noted.
- 2. The new claims 26-48 disclose a cross-linkable or cross-linked rubber composition comprising an elastomeric matrix, said composition exhibiting a reduced hysteresis in the cross-linked state and being usable in a tire tread, wherein the elastomeric matrix comprises a block copolymer having n blocks, each of said blocks comprising an essentially unsaturated diene elastomer having a molar content of units originating from conjugated dienes of greater than 15%, and one or each of said blocks which forms the chain end of said copolymer consisting of a polyisoprene, wherein n=2 or 3, wherein each polyisoprene end block and other than polyisoprene block has the number-average molecular weight specified in the present claims.
- 3. The new claims include the statement that each of the "blocks comprising an essentially unsaturated diene elastomer". The amendment does not introduce a new matter. In light of this amendment the references of record do not raise a prima facie case of unpatentability with respect to the new claims.
- 4. The new search has been made for unsaturated diene elastomers in the block copolymer. No prior art has been found or presented which either teaches or fairly suggests the unsaturated (or nonhydrogenated, or unhydrogenated) diene elastomer for the formulation of a rubber composition being usable in a tire tread.
- 5. Claims 26-48 are deemed to contain allowable subject matter.
